

## DID YOU KNOW?

### TAPE BACKUPS

Tape backup and restore procedures fail 60% of the time.

Our backup and restore procedures are continually checked to ensure they work; they have never failed.

### REDUNDANT BACKUPS

True redundancy and disaster recovery with Tape requires an identical tape drive, backup tape software, and a backup server, ideally located in an offsite facility.

Our Enterprise-level redundancy ensures that when you need your data, it's there. Our servers use virtual disk technology and store incremental changes to your data so you don't have to worry about *what if?*

### MANUAL BACKUPS

Backing up data takes time and is prone to human error. Tape restore jobs can take hours.

Automated, managed backups protect your data without taking up your valuable time. Restore jobs take just a few minutes.

### SECURITY

Our backups use military-grade encryption, keeping you and your client data safe, no matter what.

## Let Sobo Networks<sup>SM</sup> worry about your data, so you don't have to.

### Your data is your company.

Don't let disaster or a mistake destroy what you've spent time and money building.

Your company's success hinges on its data: contracts, business contacts, project files, accounting and administrative files, personal information, and a host of other documents that you can't afford to lose.

Unfortunately, computers fail, hardware wears out, viruses strike, and everyone makes mistakes. Sobo Networks<sup>SM</sup> Managed Online Backup provides peace of mind.

Our comprehensive backup solution includes a simple interface with Enterprise-level benefits.

- ▶ Backup your data on our secure servers, stored in a controlled-access facility, and protect your data from local building disasters.
- ▶ Our fully automated backup system can store incremental, historical versions of files, allowing you to easily return to previous versions or rollback changes up to 30 days old.
- ▶ We use military-grade data encryption up to 1,024 bits to protect your intellectual property and your clients' confidential information.
- ▶ Restore files quickly and easily through a simple, secure web interface.
- ▶ You can restore files to the original location or to a different computer.
- ▶ Backup just one computer or your entire company.

### Advanced server backups made simple.

Do you use Microsoft Exchange for email? Perhaps a database?

Our backup software integrates with both MS Exchange, SQL, SharePoint, and other database platforms and can run on Windows, Linux, or OS X, ensuring that your data is safe.

### Scaleable service at low monthly prices.

Storage Space	Leading Competition	Sobo Networks
100 GB	\$100	<b>\$90</b>
200 GB	\$200	<b>\$165</b>
500 GB	\$350	<b>\$300</b>

We can scale our service to fit your needs whether you use large databases of development files or simply want to store crucial contact information.
